## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

Claim 1 recites an antenna arrangement comprising a first antenna element with a first operational frequency and a second antenna element with a second operational frequency, wherein the first antenna element is a director for the second antenna and the second antenna element is a reflector for the first antenna and the first operational frequency is different from the second operational frequency. The patent to Thiel et al fails to teach the first operational frequency is different from the second operational frequency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
